

The FCC absolutely should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

The current Indiana law has made contributed to a peaceful evenings at home. Prior to it's implementation, our evenings were filled with unwanted solicitations.

You will only be opening the door to the very things that we registered to protect us against.

Again, Please do not implement anything! We currently have what we need!!!

--How effective Indiana's law has been
(e.g., "I used to receive 12 calls per
week, now I only receive one").
